

Use this tear off to measure the thickness of your existing ceiling insulation.

250 mm

200 mm

Choose the right insulation and love the savings

You'll love Earthwool® insulation because it's so easy to install in your ceiling and it will help you **save up to 30%*** on your power bill.

This is because Earthwool features high R-values, which is the measure of the thermal performance. The higher the R-value, the better for you and your wallet.

Best of all, if you already have insulation you can add a top up layer of Earthwool to maximise your savings.

How much insulation do you need?

Existing ceiling insulation	Action required	QLD	ACT/TAS/NSW/VIC/SA/WA/NT
No insulation	Insulate immediately	Earthwool R4.0** ceiling insulation	Earthwool R6.0** ceiling insulation
<70mm glasswool† or cellulose insulation, <100mm polyester insulation	Add a top up layer of insulation to improve the performance	Earthwool R4.0** ceiling insulation	Earthwool R6.0** ceiling insulation
70 - 120mm glasswool† or cellulose insulation, 100 - 170mm polyester insulation	Below recommended insulation levels. Add a top up layer	Earthwool R2.0 Multi-Use roll	Earthwool R2.0 Multi-Use roll
120 - 150mm glasswool† or cellulose insulation, 170 - 220mm polyester insulation	Adequate insulation, but less than high thermal performance. Top up and future proof your home	Earthwool R2.0 Multi-Use roll	Earthwool R2.0 Multi-Use roll

* yourhome.gov.au

** The recommended insulation R Value is based on research conducted by Pit&Sherry which identified the most cost effective (cost optimal) level of insulation to have in the home. To find out more visit www.knaufinsulation.com.au
